

Topic: Detailing NISP-NL Project approach

Date: 15-1-2019, 10:00-12:00

Participants

- **Members of Betaalvereniging Nederland (BVN)**
- **A representative of Verenigde Betaal Instellingen Nederland**
- **A TPP (to be licensed / DNB procedure)**
- **A representative of Dutch Central Bank (DNB)**

Agenda

10:00 Welcome & introduction (Gijs Boudewijn, BVN)

10:30 Detailing project approach (Max Geerling, Luc van Oorschot, BVN)

11:45 Next steps & closing (Max Geerling, BVN)

- The NISP-NL approach and planning was elaborated in more detail, focusing on the touchpoints and deliverables in Q1
- The touchpoints and deliverables of Q2 and Q3 are not detailed yet, since these depend on the outcomes of the NISP-NL collaboration in Q1
- For some topics the exact scope of the collaboration can be determined only after more clarity regarding the fallback exemption procedure in NL is available
- DNB hosts a workshop on 23-1 where they will elaborate on the fallback exemption procedure
- It was agreed that the planning and scope of the 'conformance testing subworkstream' and the 'ASPSP – DNB reporting subworkstream' are influenced by the outcome of this workshop, and the dates of the touchpoints and deliverables of these subworkstreams will therefore be fixed after the DNB workshop on 23 January
- The subworkstream 'conformance testing' was discussed more elaborately, as the group indicated a desire for more clarification on the collaborative benefits of this subworkstream. Betaalvereniging will dive further into this topic and propose a refined approach regarding the subworkstream 'conformance testing' on the 6-2-2019 meeting (see planning)
- DNB further suggested to have a look at the UK Customer Experience Guidelines of Open Banking UK (<https://www.openbanking.org.uk/document-categories/customer-experience-guidelines/>)
- Betaalvereniging will send out a draft version of the TPP Integration Testing checklist on January 18. All participants are asked to review this document between 21-25 January
- In order to achieve the goals of the NISP-NL collaboration, BVN emphasised it is of vital importance that TPPs participate in NISP-NL
