

The Digital Euro

Europe 'united by payments'

Annual Conference Dutch Payments Association

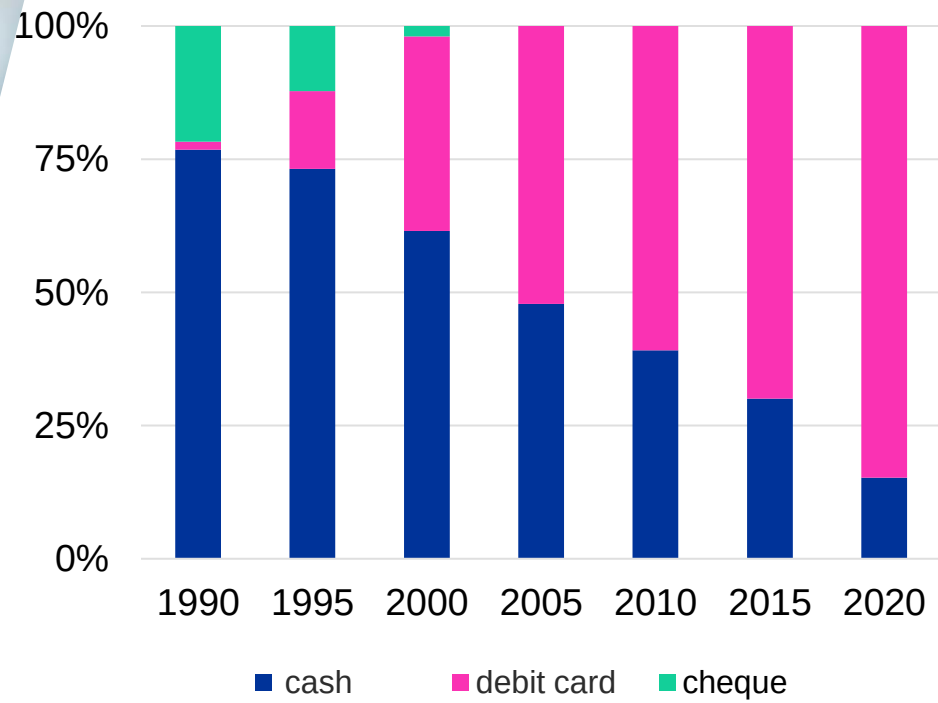

Inge van Dijk

7 November 2024

'Hold me now' (Ireland, 1987)

Digital euro to preserve a healthy balance

'Rise like a phoenix' (Austria, 2014)

Digital euro to increase European resilience

- Resilience is an urgent reason for the digital euro as geopolitical uncertainty increases
- An extra pan-European fallback option alongside cash

‘Heroes’ (Sweden, 2015)

Digital euro as a complement NOT a competitor

- Public-private partnership by design
- Digital euro setting the scene for pan-European reach facilitating private European players
 - European-wide standards at payment terminals at the POI
 - Opening up of NFC and secure elements

My douze points go to....

A shared - public and private -
pan-European future in retail
payments

Thank you!
